Facultad de Ciencias Sociales y Humanas

I.S.B.N.: 84-88549-14-8
Depósito Legal: TE-245-1993
Composición del Texto y Maquetación: M^a José Valentín
Edita: S.A.E.T.
Imprime: Perruca • Artes Gráficas

Este trabajo es una revisión de la tesis doctoral realizada en la Universidad de Oxford en 1988. La tesis titulada "Computer applications and quantitative methods in archaeology" (aprobada en 1988) se centró en la utilización de la informática en la arqueología y su aplicación a la investigación de la cultura material. La tesis se divide en tres partes principales: la primera parte aborda la teoría y los fundamentos de la utilización de la informática en la arqueología; la segunda parte examina la aplicación de la informática a la investigación de la cultura material, incluyendo la descripción y análisis de los datos; y la tercera parte presenta una bibliografía extensa sobre el tema.

Introducción al trabajo bibliográfico de investigación

En la introducción se presentan las principales características de la bibliografía existente en el campo de la arqueología y la informática. Se resaltan las principales tendencias y avances en la utilización de la informática en la arqueología, así como las principales aplicaciones y resultados obtenidos.

1 Introducción

Esta bibliografía tiene por objetivo reunir de un modo razonado los libros, artículos y otros documentos que han sido escritos sobre los diversos aspectos de la utilización de la informática en arqueología y esto para facilitar a los investigadores la localización de las informaciones útiles o necesarias para la realización de sus trabajos.

A esta publicación preceden varias fuentes bibliográficas consultables. La más extendida hasta hoy ha sido la publicada por N. S. Ryan en CAA 88¹ que tiene el gran interés de catalogar el conjunto de las comunicaciones presentadas en las conferencias anuales de Computer Applications in Archaeology (1974-88), además de una parte importante de los títulos anglo-sajones sobre el tema. Algunos libros como *Archeologia e calculatori* de P. Moscati² y *Data Processing in Archaeology* de J. D. Richards y N. S. Ryan han representado un aporte suplementario gracias a sus bien seleccionadas bibliografías. La *Lettre d'Information, Archéologues et Ordinateurs*, editada por H. Ducasse, presenta, desde 1982, bajo la forma de un listado bibliográfico, las nuevas adquisiciones de la biblioteca del Centre de Recherches Archéologiques (CNRS) de Valbonne. Finalmente, cursos y seminarios, como el de F. Djindjian en la Universidad de París, ofrecen excelentes bibliografías fotocopiadas, que desgraciadamente tienen una distribución limitada y de difícil acceso³. Al lado de las bibliografías impresas existen los bancos de datos bibliográficos, representados principalmente en Francia por FRANCIS⁴.

En consecuencia, nuestra idea ha sido el intentar ir más lejos en la recopilación de las obras y ofrecer un útil mejor adaptado a las necesidades de la investigación que una simple enumeración de autores y de títulos. El punto de partida de este trabajo ha sido la bibliografía de la tesis de D. Arroyo-Bishop, la cual contenía 1410 títulos susceptibles de ser incluidos dentro de un conjunto sobre arqueología e informática. Como el lector podrá constatar, existía una gran disparidad entre la cantidad de publicaciones recensadas y las publicadas, et por lo tanto, una real necesidad de emprender una extensa bibliografía sobre el tema. Esta tercera edición añade 1059 títulos a los 1821 de la primera.

2 Organización de la bibliografía

Una bibliografía ordenada alfabéticamente no ofrece una gran utilidad, aparte de enseñar el volumen de la documentación disponible y ponerse, de forma somera, a la disposición del investigador. Los documentos de esta misma bibliografía repartidos en varias categorías mejoran su utilidad, pero fuerza, a menudo, a un compromiso en el momento de una clasificación monolítica. Lo ideal es el poder clasificar el documento en tantas categorías como sea necesario para representarlo de una manera adecuada. Así se ha procedido para establecer la base de las divisiones y sub-secciones de la presente bibliografía. Igualmente se ha querido mejorar la utilidad de esta obra incluyendo una serie de índices sobre palabras-clave como los nombres de programas, lugares, etc.

¹ Este trabajo presenta 719 títulos en el artículo "A bibliography of computer applications and quantitative méthodes in archaeology", in Computer and Quantitative Methods in Archaeology 1988, RAHTZ (S. P. Q.) (Ed.), BAR International Series 446(i), pp. 1-27, Oxford, 1988.

² Desde 1990, P. Moscati edita la revista *Archeologia e calculatori* que contiene, al final de cada número, una excelente bibliografía anual.

³ F. Djindjian ha escrito después *Méthodes pour l'archéologie* (1991) con una importante bibliografía sobre los métodos cuantitativos.

⁴ El Banco de datos FRANCIS se localiza en la Maison des Sciences de l'Homme y en 1990 contenía cerca de setecientos títulos en relación con los criterios de esta bibliografía.

Las obras, presentadas por orden alfabético y fecha de aparición, han sido numeradas para facilitar su búsqueda y ofrecer una mayor flexibilidad para los índices. En estos se ha elegido el incluir, además del número de la obra, como en las presentaciones tradicionales de este tipo de índices, el autor y el año de publicación, lo cual creemos que ayudará a discernir más rápidamente los documentos a consultar.

La bibliografía es presentada según la clasificación siguiente:

- | | |
|---|---|
| 1 Gestión de los datos | 7 Excavación y prospección |
| 1.1 Bancos de datos | 7.1 Arqueología del paisaje |
| 1.2 Bases de datos | 7.2 Arqueología urbana |
| 1.3 Codificación y tesaurus | 7.3 Cartografía et topografía |
| 1.4 Lista general por autor | 7.4 Excavación (general) |
| 1.5 Sistemas de documentación | 7.5 Prospección y carta arqueológica |
| | 7.6 Sistemas de Información Geográficos |
| | 7.7 Estratigrafía |
| 2 Métodos de análisis matemáticos, ... | 8 Gestión del patrimonio |
| 2.1 Análisis de correspondencias | 8.1 Lista general por autor |
| 2.2 Análisis de datos por material | 8.2 Lista por nombre |
| 2.2.1 Cerámica | |
| 2.2.2 Lítico | |
| 2.3 Análisis de datos (general) | |
| 2.4 Análisis de formas | |
| 2.5 Análisis "cluster" | |
| 2.6 Análisis de materiales | |
| 2.7 Análisis multivariante | |
| 2.8 Análisis espacial | |
| 2.9 Clasificación | |
| 2.10 Muestreo | |
| 2.11 Lista general por autor | |
| 2.12 Modelización | |
| 2.13 Cuantificación | |
| 2.14 Seriación | |
| 2.15 Simulación | |
| 2.16 Tipología | |
| 3 Programas | 9 Ciencias, técnicas y estudios |
| 3.1 Lista general por autor | 9.1 Arqueozoología |
| 3.2 Lista por nombre | 9.2 Arquitectura |
| 4 Lugares geográficos y otros nombres | 9.3 Datación |
| 4.1 Lista general por nombre | 9.4 Dendrocronología |
| 5 Periodos | 9.5 Egiptología |
| 5.1 Prehistoria | 9.6 Epigrafía |
| 5.2 Prehistoria/protohistoria | 9.7 Iconografía |
| 5.3 Protohistoria | 9.8 Metalurgia |
| 5.4 Antigüedad (general) | 9.9 Necrópolis |
| 5.5 Clásica (general) | 9.10 Numismática |
| 5.6 Romano | 9.11 Osteología |
| 5.7 Medieval | 9.12 Textos |
| 6 Materiales y elementos | 10 Sistemas expertos |
| 6.1 Cerámica | 10.1 Lista general por autor |
| 6.2 Lítico | |
| 6.3 Metal | |
| 6.4 Mosaicos | |
| 6.5 Vidrio | |
| | 11 Imagen y grafismo |
| | 11.1 Infografía |
| | 11.2 Grafismo |
| | 11.3 Fotografía |
| | 11.4 Teledetección |
| | 11.5 Video y videodisco |
| | 12 Educación y formación |
| | 12.1 Lista general por autor |
| | 12.2 Tesis y diplomas |
| | 13 Museos |
| | 13.1 Lista general por autor |
| | 14 Publicación |
| | 14.1 Lista general por autor |
| | 15 General |
| | 15.1 Panoramas y compilaciones |

3 Conclusión

Esta bibliografía está destinada a crecer periódicamente con la adición de nuevas publicaciones⁵ y, es de esperar, que la próxima edición beneficiará ampliamente del aporte y correcciones que nos serán remitidas⁶.

⁵ Para seguir más regularmente las nuevas apariciones en el sector de la arqueo-informática, se recomienda el consultar la *Lettre d'Information, Archéologues et Ordinateurs*, del Centre de Recherches Archéologiques (CNRS) y la revista *Archeologia e Calcolatori, Edizioni all'Insegna del Giglio, Firenze*.

⁶ El correo debe ser enviado al GDR 880 du CNRS, Institut d'Art et Archéologie, 3 rue Michelet, 75006, Paris, Francia.
